

Discover Your Umbrella of Consciousness

A powerful and thought-provoking half-day workshop facilitated by
Master Hand and Fingerprint Analyst Roberta Coker

Integrative Hand and Fingerprint Analysis is a potent, non-predictive spiritual and scientific practice that provides dynamic personal insights and tools to promote powerful personal growth

Five months before you were born, your unique fingerprints were permanently and unalterably formed. They hold the key to understanding who you came here to be, what you came here to do, the work you came here to accomplish, and the challenges that you came here to face.

Your distinct fingerprints solidly identify what are known as your specific:

- **Life Purpose** — your aptitudes, where you find your greatest fulfillment, your most powerful life path
- **Life Lesson** — your innate challenges, specific fears that can hold you back, your unique opportunities for growth
- **Umbrella of Consciousness** — your overarching perspective, the lens through which you view the world that affects every thought you have, word you say, decision you make, and action you take

Are you ready to live your Life Purpose out loud?! Join us for a one-of-a-kind half day adventure to discover your individual Umbrella of Consciousness and unlock the secrets of how to live your right life! Get your fingerprints interpreted in a safe and seriously fun environment and gain the tools that will help you move forward with your true Life Purpose.
